Continuation of 4(e) Other: The amendment filed on 12 January 2007 canceling all claims drawn to the elected invention and presenting only claims drawn to an invention that was not present in the originally filed application is non-responsive (MPEP § 821.03). The remaining claims are not readable on the elected invention because the remaining claims are drawn to a method of preparing an alloy that would be resistant to hydrogen embrittlement and the elected invention was an article made from a steel composition. Furthermore, these claims would have been subject to restriction had they been presented in the originally filed application.
